

# Automatic Part List Plug-In Build 1331 Release Notes

August 7, 2009

## Description

The Automatic Part List plug-in provides users an easy and quick method for listing all the subassemblies and parts that make an assembly.

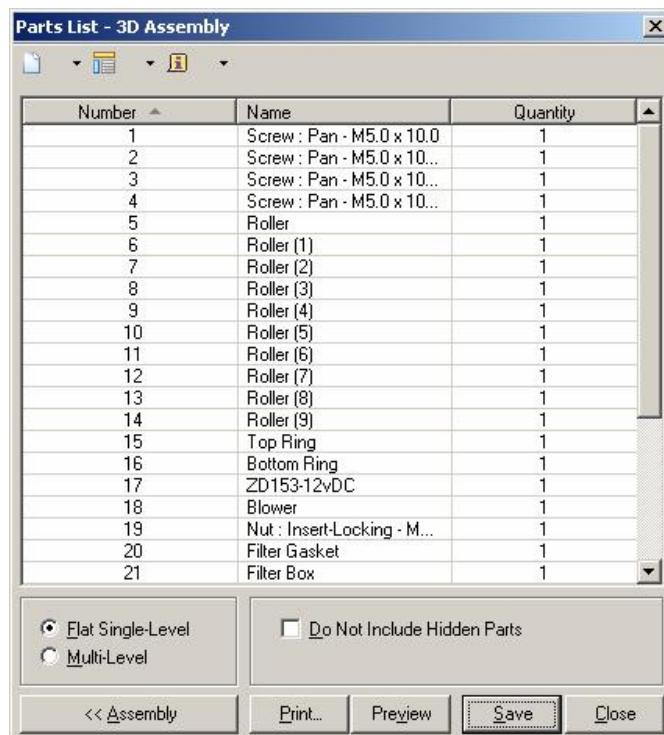

## Requirements

- SpinFire Professional 8.3 or above
- Reader Build 1247
- .Net 2.0

## Procedures

### To Create Parts List

1. Invoke **Parts Lists** from the **Files + Export** menu on the toolbar.
2. The Parts List dialog gives the user options to select the layout of the list and write the information to a text file for incorporation into another document.

For more detailed information, the plug-in comes with complete on-line documentation. To access it select the information icon from the plug-in dialog.
