

## **3D\_Evolution 4.5 SP2**

This version exports Jt 10.5 files containing STT data and is certified by Daimler.

This release contains mainly bug fixes and many small improvements.

**List of resolved tickets since version 4.5 SP1**

Ticket ID	Description
5574	Convert to stl problem - Geometry lost after conversion
10334	PDF generation Copyright sentence have problem with french accents
10557	DWG Reading Problem
10991	Step reading problem
11240	Captures in PDF 3D
12068	WRL loading - Models too big by a factor of 1000
12500	Shape numbering - JT
12519	Layers in step Ap 242 from creo are not loaded
12535	DWG writing - Model tree - additional knots
12607	Problem with DWG curves
12625	vcredist installation missing some times
12680	Reading PMI from CREO files, size of tolancement is different
12688	Nx Loading problem - visibility
12712	NX file reading issue
12791	Jt Writing issue
12830	Feature Based translation between NX to Inventor
12853	3D_Analyzer Plastic Edition Check Cooling Channel Crash
12879	Surface Continuity G1
12909	Fatal Error during simplify all in one step
12916	Loading Problem CatiaV5 R26
12939	NX PMI conversion to CATIA V5 R19 via Plugin
12943	SolidWorks reading issue - Default configuration can't be open
12971	Create Bounding Box problem - annotation workshop
12972	Documentation problem with links in internal browser
12973	Fatal Error after Covertation to Fbx
12977	Fatal Error after checking Thickness
12988	Vrml reading problem
12998	MAN convert - colors lost after Heal()
13010	MAN xml export structure problem - xml different
13021	Error loading JT files
13023	Stp reading problem
13024	Exception during loading JT file
13032	Step Visibility problem
13050	CGR writing problem with external references STEP
13059	Structure problem - creo step - additional components
13080	Missing catiaV5 objects after reading
13087	3D_Analyzer Thickness checker arrow problem
13130	Virtual Machine (VM) batch problem - evolution4.exe stays open

Ticket ID	Description
13157	LDAP Authentication
13165	NX reading problem
13166	NX reading problem
13190	Step AP203 not read in Solidworks
13193	DGN dosen't opens
13216	Reading PMI from CREO files, Points instead of commas
13260	NX reading problem
13263	SLDASM - reading problem
13267	Rebuild feature regression
13268	3dxml healing problem
13274	3D-PDF Annotation problem
13295	xt writing issue - models in Solidworks invalid and incomplete
13318	JT writing issue
13332	Airbus stickers SVG files contains polylines curves
13391	Wall thickness - Representation error
13411	Not able to import Settings.
